01 / COMPANY OVERVIEW

Company Overview

MERATH AL SHARQ (MASCO) is a privately held Iraqi limited liability company based in Basra, providing general contracting, industrial supply and project support in Iraq. Our services cover civil, building and mechanical, electrical and plumbing (MEP) work packages; the supply of materials, equipment and spare parts; and maintenance, storage, logistics and workforce support.

We review technical requirements, quantities, site conditions and schedules before defining resources, responsibilities and execution and delivery arrangements.

A CLEAR BASIS FOR DELIVERY

Clear scope / Defined responsibilities / Coordinated execution and delivery

04 / CORE SERVICES

General Contracting

MASCO undertakes civil, building and MEP work packages in accordance with the technical scope and project programme. Services include site preparation, building works, finishing, fit-out, repairs and improvements, with resources, access, inspection and handover requirements defined for each package.

Civil & building works

01

Civil construction, building works, finishing, fit-out, site preparation and supporting works.

Mechanical & electrical

02

Mechanical and electrical packages, including heating, ventilation and air conditioning (HVAC) and plumbing, subject to technical review.

Repairs & site works

03

Repair assignments and site improvements planned around access, surrounding activities and acceptance requirements.

EXECUTION MODEL

MASCO defines the resources and execution arrangements for each work package, including direct resources, qualified subcontractors and specialist providers where required. Execution and coordination responsibilities and acceptance requirements are set out in the agreed scope.

BEFORE WORK

Drawings, quantities and site access.

DELIVERY BASIS

Resources, programme and acceptance.

05 / GENERAL CONTRACTING

Work Package Planning

We establish a clear execution basis for each work package by reviewing drawings, specifications, quantities and site conditions and agreeing responsibilities, work sequence, inspection requirements and handover arrangements with the client.

01 Establish the requirement

Drawings, quantities and specifications provide the starting point. Access, surrounding activities and programme constraints help define how the work can be organised.

02 Allocate responsibilities

We identify responsibility for each part of the work, technical review, site coordination and decisions requiring client approval.

03 Agreed execution and handover records

An execution programme, progress updates, inspection requests, action tracking and handover records can form part of the work package. Formats and acceptance points are established with the client.

06 / CORE SERVICES

Industrial Supply

MASCO sources and supplies industrial materials, equipment, spare parts and consumables for project requirements. We review specifications, quantities, technical suitability, availability, required documentation and delivery terms before presenting the offer.

01

Piping & mechanical

Pipes, valves, fittings, flanges, gaskets, mechanical materials and accessories.

02

Electrical & instrumentation materials

Electrical materials, cables, accessories, instrumentation and control items.

03

Safety, tools & MRO

Personal protective equipment (PPE), safety equipment, workshop tools, fasteners and maintenance, repair and operations (MRO) consumables.

04

Construction & facilities

Civil and building materials, HVAC and plumbing supplies, and facility consumables.

SOURCING & SUPPLIER FOLLOW-UP

We follow up sourcing, technical enquiries and proposed alternatives with suppliers, and set out product details, documentation and delivery arrangements in the technical and commercial offer.

FOR YOUR SUPPLY ENQUIRY

Product list / Specifications / Quantities / Delivery point / Required date

07 / INDUSTRIAL SUPPLY

Procurement & Supply Documentation

Industrial supply starts with a clear material request. MASCO brings product requirements, sourcing enquiries and delivery information together so that the offer can be assessed on a consistent basis.

01 Define the item

Share the description, specification, quantity and unit of measure. Include the preferred manufacturer or acceptable alternatives, intended application and delivery point.

02 Resolve technical enquiries

Sourcing and supplier follow-up address availability, technical questions, proposed alternatives and delivery terms. Differences from the requested specification are identified for review.

03 Confirm required supply documentation

The required product and delivery documents form part of the order review, together with confirmation of source availability and any limitations. Depending on the materials and order requirements, the document set may include data sheets, certificates of conformity or origin, test certificates, packing lists and delivery records.

BEFORE ORDER CONFIRMATION

Product / Quantity / Accepted specification / Required documents and source availability / Delivery terms

Maintenance & Facility Support

MASCO provides building and facility maintenance, repairs and supporting works within a defined scope. We review the facility’s condition, required work and access arrangements, coordinate activities around ongoing operations, and follow progress, inspections and punch-list items through to handover, in line with the agreed assignment requirements.

Maintenance & repairs	Inspection & follow-up
Building upkeep, repair assignments and supporting works within the accepted scope.	Inspection coordination, action tracking and punch-list follow-up through to handover.

FROM REVIEW TO HANDOVER

01	Review the requirements	Review the condition, required work, access and acceptance requirements in relation to ongoing facility activities.
02	Coordinate the work	Plan coordination around facility activities; follow maintenance progress, inspection arrangements and reporting.
03	Complete the handover	Track open items, follow up closure and compile the required handover records.

09 / FACILITIES

Warehousing & Project Storage

Warehouse facilities in Basra support the storage of project materials before delivery. Use is arranged according to the materials, holding period and schedule, with receiving, release and transport requirements coordinated for each assignment.

WAREHOUSE FACILITIES / BASRA

PROJECT STORAGE

Materials and holding period
Receiving and release requirements
Delivery schedule and transport

10 / FACILITIES

Technical Showroom

Mechanical components and product references.

Technical showroom - valve and actuator displays.

The technical showroom presents valve and actuator samples, mechanical components and product reference materials. It provides a setting for discussing supply requirements and the technical documentation associated with the requested products.

11 / PROJECT SUPPORT

Logistics & Project Support in Iraq

MASCO supports companies operating in Iraq through local supplier follow-up, storage and delivery coordination, mobilisation, and the organisation of project records and progress updates. Support tasks and coordination responsibilities are defined around the location, programme and needs of each assignment.

01

Supplier Follow-up

Follow up sourcing enquiries, required documents and supplier delivery arrangements.

02

Storage & Delivery Coordination

Align storage needs with delivery points, timing and site access.

03

Local Project Support

Assist companies working in Iraq with mobilisation, local supplier communication and records needed for work coordination.

PROJECT DOCUMENTATION

Supplier records, progress updates, delivery records and close-out information can be included in the assignment.

Transport arrangements

We coordinate transport through suitable external service providers, with delivery responsibilities and coordination requirements defined for each assignment.

12 / PROJECT SUPPORT

Recruitment, HR & Workforce Support

MASCO provides candidate sourcing and screening, review of qualification documents, mobilisation coordination and administrative workforce support. Role, skill, location and timing requirements, together with each party's responsibilities, are established with the client before the service begins.

Role profile / Qualifications / Location / Programme

01 Source & screen

Search for candidates and review their experience against the role profile. Clarify technical expectations, availability and the information needed for nomination.

02 Review qualification documents

Review the qualification records supplied by candidates and identify any additional checks required by the client. Nomination and acceptance are addressed through the assignment.

03 Coordinate mobilisation

Coordinate mobilisation arrangements and agreed start dates, together with personnel administration and reporting. The required documents and administrative responsibilities are confirmed for the engagement.

13 / DELIVERY APPROACH

How We Deliver

The process begins with a review of your requirements, followed by the offer, agreement on scope and responsibilities, and coordination of execution or supply through to handover. The steps below show what we review with you and what is needed for the next stage.

01

Share your requirements

Send the work scope or product list, quantities, location and target dates.

02

Clarify the details together

Together, we clarify specifications, site coordination, access and document requirements.

03

Review resources and supply sources

MASCO assesses the delivery approach, resources, suppliers and specialist involvement.

04

Present the technical and commercial offer

MASCO sets out the technical and commercial basis, deliverables and proposed programme.

05

Agree scope and responsibilities

Together, we confirm acceptance criteria, coordination responsibilities, exclusions and commercial conditions.

06

Coordinate execution or supply

MASCO follows the work, materials, records and delivery arrangements.

07

Follow through to handover and close-out

MASCO completes the agreed records and follows up outstanding items and acceptance.

14 / QUALITY & HANDOVER

Quality Assurance, Acceptance & Handover

We review specifications, acceptance criteria and required documentation before execution or supply, and coordinate inspection arrangements with the client, suppliers and relevant parties. Handover documentation and the follow-up of open items and corrective actions are defined by the agreed order or work-package requirements.

01 / ACCEPTANCE BASIS

Define what will be reviewed

Establish the technical references, product or work requirements, and information needed for acceptance. Client review and third-party inspection arrangements are addressed within the assignment.

02 / REQUIRED EVIDENCE

Assemble the relevant records

Deliverables can include product data, source-issued certificates, inspection records, packing lists and delivery documents. The document set follows the material or work package and the accepted order.

03 / COMPLETION

Follow through to handover

We follow up open items, outstanding documents and corrective actions included in the assignment until the agreed handover requirements are completed. Where a handover file is required, its contents and submission format are agreed with the client.

Possible outputs: document register / technical records / delivery evidence / close-out file

15 / MANAGEMENT COMMITMENTS

Health, Safety, Security & Environment

MASCO is committed to protecting workers' health and safety, respecting site-security requirements and limiting the environmental impacts of its activities. HSSE responsibilities and task-specific arrangements are defined according to risk assessment, client requirements and site rules.

01

Risk assessment & workforce readiness

Identify activity risks, induction and competence needs, and protective equipment requirements before work. Communicate the relevant precautions to those involved.

02

Stop-work authority & reporting

Empower personnel to raise unsafe conditions and stop unsafe work. Address incident reporting, follow-up and corrective actions through the responsible contacts.

03

Site security & access controls

Respect site access controls, identification requirements and the protection of people and property. Coordinate applicable security arrangements with the client and site authorities.

04

Environmental protection

Consider waste handling, pollution prevention and responsible use of resources. Address the protection of the surrounding area in the activity requirements.

05

Emergency preparedness

Identify applicable emergency arrangements, communication routes and response responsibilities. Link the task to the established site emergency procedures.

06

Supplier & subcontractor requirements

Communicate relevant HSSE requirements to suppliers, subcontractors and service providers. Address their responsibilities alongside the work and delivery interfaces.

16 / MANAGEMENT SYSTEMS

Management System Certifications

MASCO holds management system certificates for quality, environmental management, and occupational health and safety under the standards listed below, covering its stated activities in trade and supply, contracting, maintenance, logistics and manpower support. Certificate copies are available for relevant procurement and prequalification requests.

ISO 9001:2015

Quality management

Specifications, acceptance requirements, relevant records and follow-up of agreed actions.

ISO 14001:2015

Environmental management

Environmental aspects of activities, resource use, waste handling and applicable requirements.

ISO 45001:2018

Occupational health & safety

Activity risks, worker involvement, protective arrangements and occupational health and safety responsibilities.

CERTIFICATION BODY

Hawk Eye Certifications Private Limited

17 / WORKING RELATIONSHIPS

Responsibilities, Communication & Business Integrity

MASCO defines responsibilities for commercial communication, technical review, and execution and handover coordination for each assignment. This includes identifying contacts, decisions required from the client, and the roles of suppliers, subcontractors and specialist providers involved in the work.

COMMERCIAL COMMUNICATION

Scope & commercial decisions

Identify the contacts responsible for the enquiry, the offer and changes affecting scope, price or programme.

TECHNICAL REVIEW

Requirements & acceptance

Clarify the drawings, specifications, product documentation and technical decisions needed for the assignment.

EXECUTION COORDINATION

Resources & work coordination

Allocate execution, supply and site-coordination responsibilities, together with the information needed for progress and delivery.

HANDOVER COORDINATION

Records & open items

Establish the route for inspection arrangements, outstanding documents and completion of the accepted scope.

BUSINESS INTEGRITY

We are committed to ethical business conduct, transparent procurement and compliance with applicable laws.

Our engagements address confidentiality, conflict-of-interest disclosures, gifts and anti-bribery requirements through the applicable conditions and declarations.

Quotation & Prequalification Enquiries

Send your project requirements or prequalification request to MASCO's principal email. Clear technical and commercial information helps us review the enquiry and identify the documents needed for our response.

01 Request a quotation

Send the scope or material list, drawings or specifications, quantities, location and required dates. State the acceptance criteria, document requirements and any buyer forms.

02 Request prequalification information

Identify the contracting entity, service category and requested evidence. Corporate identification and management system certificate copies are available for relevant requests, subject to the purpose and applicable confidentiality requirements.

For suppliers

Suppliers may submit company details, product categories, technical information and contact details for initial review. An introduction does not constitute approval for engagement.
